SABBATH MODE

You can preset cooking to complete before the Sabbath begins, and then automatically enter warming mode when the cooking cycle is complete. Your family's meal will be warmed and ready to serve when you are ready for dining. This provides your family with a delicious, warm Sabbath meal, while effortlessly ensuring observance of the Sabbath.

Since oven temperatures may not be set, adjusted or turned off on the Sabbath, Connect Io disables all oven controls with exception of the OFF button (if ever needed) after the SABBATH MODE is initiated. In addition, all other visible and audible signals—such as oven lights, displays, tones—are disabled for the Sabbath. Opening the oven door, for example, does not result in illuminating interior oven lights while in the SABBATH MODE. And, opening one of the oven doors will not activate the heating elements during the Sabbath time period *you choose*.

These exclusive Connect Io features prevent any inadvertent oven control, and enable you and your family to relax and enjoy meals with confidence during the Sabbath. Connect Io's SABBATH MODE is easier to use, and gives you more Sabbath capability than any other oven model available today.

HOLIDAY MODE

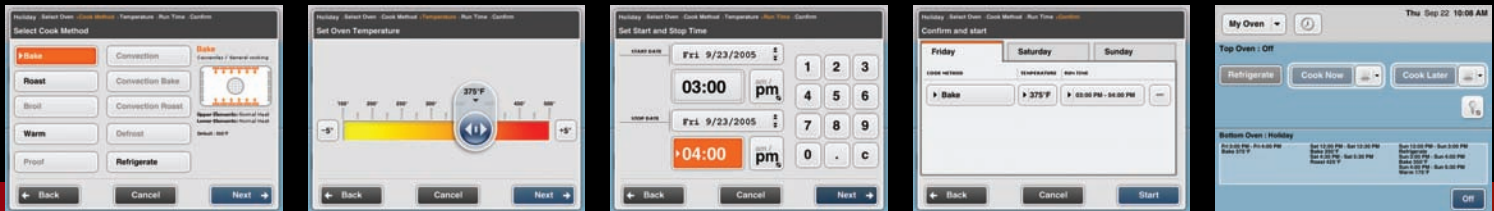

For the Holidays (Yom Tov), Connect Io offers you and your family still more flexibility with HOLIDAY MODE. You now have the ability before a Holiday begins to preset one oven or both ovens to operate over a 72-hour period, with multiple cooking or refrigeration periods within the same cooking day. Also a Connect Io exclusive, HOLIDAY mode provides all the features of SABBATH MODE, plus the extra convenience of three-day advance programming for baking, roasting, warming, and refrigeration. Temperature adjustment is permitted at any time when in HOLIDAY MODE. Observing tradition is possible with a random delay between your temperature change request and an actual temperature change.

Connect Io is perfect for your Sabbath and Holiday needs. As an example of the powerful HOLIDAY MODE features, you can easily preset Connect Io to refrigerate your freshly prepared meal prior to the cooking cycle in HOLIDAY MODE. Then continue in warming or refrigeration modes after cooking is completed. The warming time can be preset to warm for a preset period, and then shut off at a time you select.

Enjoy a certified Star-K kosher home-cooked dining experience while spending more time connecting with family and friends. Sabbath and Holiday cooking has never been easier or more delicious than with the Connect Io Intelligent Oven.

POWERFUL EASY-TO-USE INTERACTIVE MENUS

Easy-to-use interactive menu screens allow you to plan and prepare delicious home-cooked meals in a snap. Select from a wide variety of cook methods; easily store and retrieve your favorite menu items; cook now or later; add, edit, or delete cooking steps; or just refrigerate at your command. You can effortlessly adjust any preset to your own personal taste with a simple touch screen command. First in advanced oven refrigeration, first in remote Internet cooking technology, first in family-friendly interactivity, first in quality: Ultimate luxury and convenience for your lifestyle.

PROGRAM MEALS TO BE READY WHEN YOU ARRIVE HOME.

TMIO, the leader in kitchen appliance innovation, brings you the multi-award-winning Connect to Intelligent Oven, Professional Series, refrigerated, Internet-controlled, 30-inch electric double wall oven. Connect to creates unprecedented mobility for your household, and revolutionizes your lifestyle and cooking experience, allowing you to program, command, and control your oven remotely from anywhere in the world. A true dream appliance for those with busy lifestyles, **dinner is ready when you are.**

REFRIGERATED DOUBLE OVEN

COOL-CONNECT-COOK. Dinner is ready when you are. A double oven, advanced refrigeration system in Connect to allows you to conveniently store your prepared meals for cooking later, whenever and from wherever you like.

INTERNET, CELL PHONE, AND TELEPHONE CONTROLLED

Connect to features built-in refrigeration to keep food fresh, plus Internet connectivity to allow you to change any cooking function from anywhere in the world while on-the-go. The world's first appliance that lets you call home from your cell phone or touch-tone land line to get dinner started, simply dial up your oven, and tell the Connect to Intelligent Oven when you want dinner to be ready. Any oven function can be changed in real time from a land-based touch tone phone, cell phone, or the Internet, giving you more time for your family and lifestyle. Connect with Connect to and reconnect with family and friends.

ENVIRONMENTALLY FRIENDLY SELF-CLEANING

TMIO's own advanced engineering gives you self-cleaning Green Clean™, for supreme energy-efficiency and safety. Green Clean saves on your energy bill, and contributes to a healthy environment by greatly reducing power consumption. And, unlike most oven manufacturers, the Connect to oven uses no formaldehyde and no other harmful substances in its cleaning cycle. The Connect to Green Clean employs a 100% safe, clean, environmentally friendly, and non-toxic self-cleaning process.
